Education

VIT Bhopal University, Bhopal **November 2024 – Present**
B.Tech in Computer Science and Engineering *CGPA:* ***9.18 / 10.0***

St. John's Co-Ed School, Prayagraj & SARJ School, Prayagraj
ICSE Class 10th: ***92%*** *and CBSE Class 12th:* ***First Division with Distinction*** *2020 & 2022*

Technical Skills

Languages: C, C++, Java, Python, Kotlin
Mobile Development: Android, Jetpack Compose, Room Database, Firebase
Backend & APIs: REST APIs, JSON, Retrofit
Databases: MySQL, Room Database, Firestore, Firebase Realtime Database
Machine Learning & Data Analysis: Pandas, NumPy, Matplotlib, TensorFlow, ML Kit
Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Computer Network (CN), Operating System (OS), Software Engineering Best Practices
Version Control/Developer Tools: Git, GitHub, Android Studio, VS Code, Google Play Console, Agile Development

Projects

Chatroom App (2025) | Kotlin, Jetpack Compose, Firebase GitHub
- Implemented **Firebase Authentication (Email/Password)** for secure login & signup.
- Added **real-time messaging** using Firebase Realtime Database.
- Built responsive UI with **Jetpack Compose Navigation** for seamless screen transitions.

Weather App (2025) | Kotlin, Jetpack Compose, OpenWeather API GitHub
- Integrated **REST APIs** (OpenWeather API) using **Retrofit** to fetch live weather data.
- Implemented **location-based search** and dynamic UI updates.
- Added error handling and offline caching for better user experience.

Task Reminder App (2025) | Kotlin, Jetpack Compose, MVVM, Room DB GitHub
- Designed and developed a task management app with **add, edit, and delete** functionalities.
- Implemented **local data persistence** using Room Database with offline support.
- Integrated **Kotlin Coroutines** for asynchronous operations and smooth performance.

Rakshak — Women Safety App (2026) | Kotlin, Jetpack Compose GitHub
- Built an offline-first safety app with **one-tap SOS** sending SMS + live location.
- Implemented voice trigger ("Help Rakshak") and volume key SOS using **SpeechRecognizer** & **AccessibilityService**.
- Designed home screen widget for instant emergency access.
- Integrated **FusedLocationProviderClient** for accurate GPS tracking with fallback handling.
- Ensured Android 14 foreground service compliance and reliable background execution.

Experience

Android Club Member | VIT Bhopal University ***2025 – Present***
- Actively contributed to the **design and development of multiple Android applications** including a Snake Game, Shopping List App, Weather App, Chatroom App, and Task Reminder App.
- Built apps using **Kotlin, Jetpack Compose, MVVM architecture, Coroutines, and Room Database**, ensuring clean, scalable, and maintainable code.
- Integrated **Firebase Authentication and real-time features** for chat-based applications, enhancing user experience.
- Collaborated with peers in brainstorming, debugging, and **peer learning sessions**, fostering a culture of knowledge-sharing.

Extracurriculars

- Ranked among the **Top 20** teams in the **Dawn of Code Hackathon** by VIT Bhopal.
- Solved over **220+ DSA** problems combined on other platforms like **LeetCode**, **CodeChef**, **Codeforces** and **Geeks for Geeks**
- Shortlisted in **Smart India Hackathon** after clearing internal hackathon (Top **45** out of **950** teams)
